

## Exp No: 7b      Data Visualization using Tableau

**Date:**

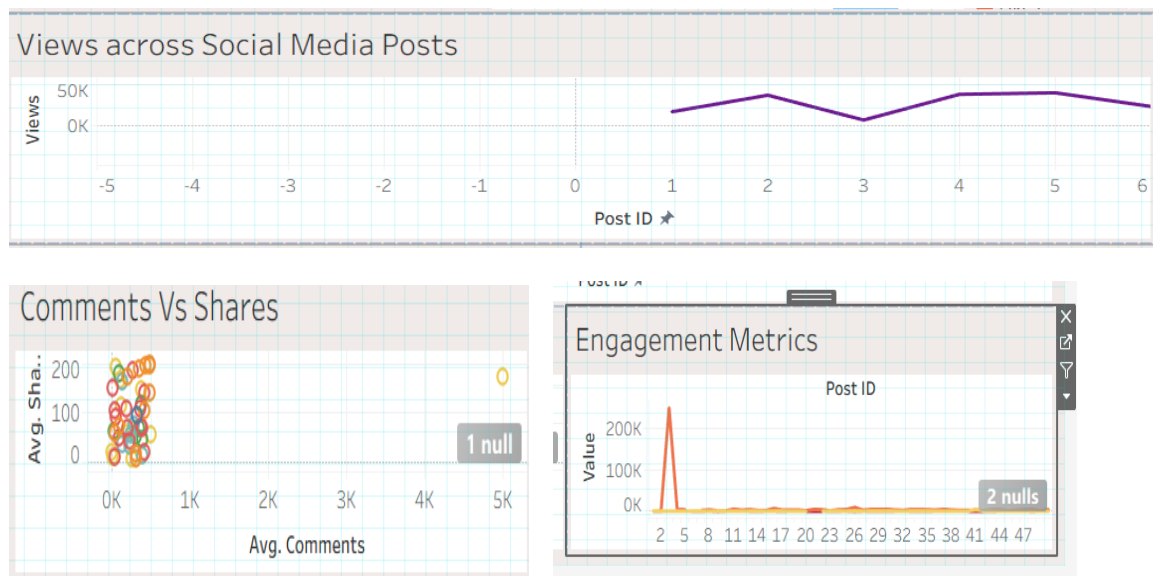

### **Aim:**

To analyze views, comments, shares and overall engagement metrics of social media posts using Tableau

### **Algorithm:**

1. Create a worksheet to analyze Views across Social Media Posts.
2. Use Post ID as the dimension and Views as the measure.
3. Create a line chart to visualize the variation in views across posts.
4. Create a Comments Vs Shares worksheet.
5. Place Comments on one axis and Shares on the other axis.
6. Use a scatter plot to analyze the relationship between comments and shares.
7. Create an Engagement Metrics worksheet to visualize engagement-related measures.
8. Combine the worksheets into a single Tableau dashboard.
9. Apply suitable formatting, titles and labels for better interpretation.
10. Analyze the dashboard to identify variations in social media engagement.

### **Output:**

### **RESULT:**
