

Exp No:6 a Data Visualization using PowerBI

Date:

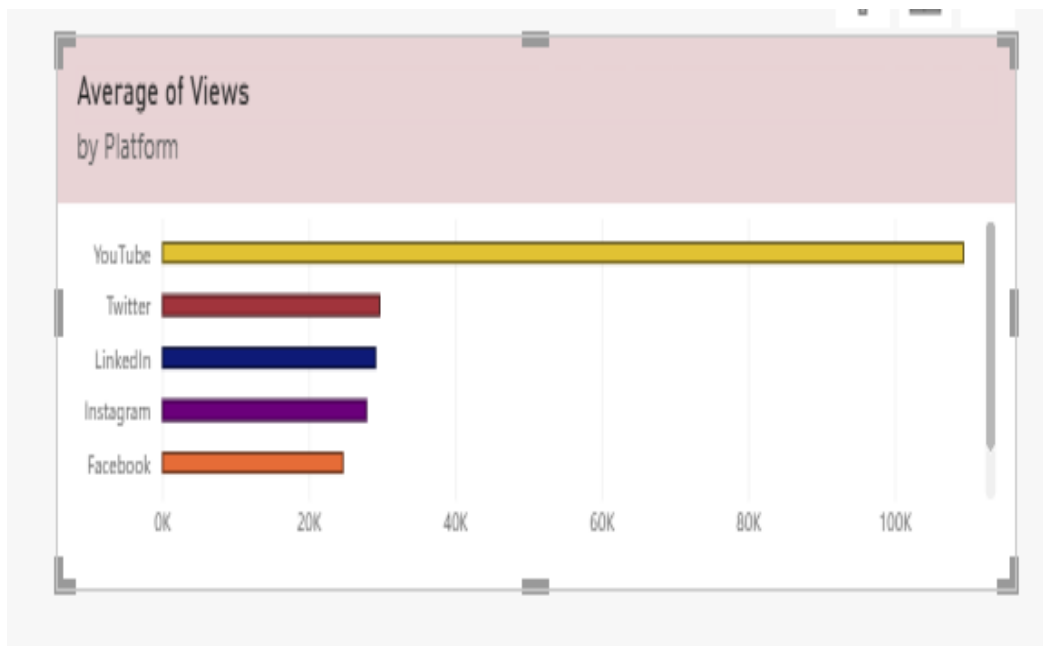

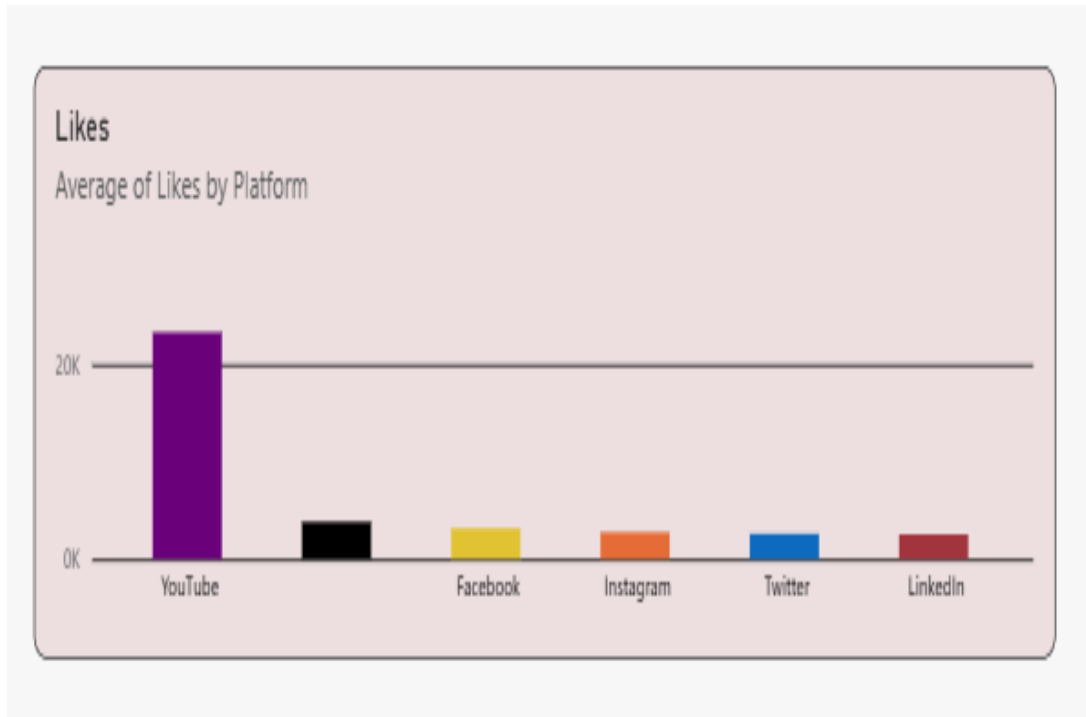

Aim

To import the social media dataset into Power BI and create basic visualizations for analyzing platform-wise engagement.

Algorithm

1. Open Power BI Desktop.
2. Import the social media dataset using Get Data → Text/CSV.
3. Load the dataset into Power BI.
4. Create a Clustered Column Chart using:
 5. Platform → X-axis
 6. Likes → Y-axis
 7. Aggregation → Average
8. Create a Bar Chart using:
 9. Platform → Axis
 10. Views → Values
 11. Aggregation → Average
12. Add suitable titles to the visualizations.
13. Arrange the charts appropriately on the report canvas.

Output:

Result: Thus, the social media dataset was successfully imported into Power BI and basic visualizations were created to compare average Likes and Views across different social media platforms.
